## Student Security Solution

SaHarsh Solutions presents a unique Student Security Solution which integrates GPS tracking system installed in school vehicle with the Child Security Software. It can be used for any school vehicle like van, bus or rickshaw. It provides peace of mind to parents and school management at very economical price. They get real time location of vehicle carrying their child. It becomes a sense of security in case of emergency situations like riots, abnormal weather conditions, traffic jams etc. Schools offering this value added service get aid in showing their concerns for students and their parents which helps them to get distinguished status.

### Features:

- Real Time Tracking- it enables school authorities, fleet owners and parents to keep track of the bus online
- Parents receive SMS alerts when school bus reaches or leaves school premises.
- They also get SMS alert when school bus is just one stop away from their location for pickup or drop thereby saves their time from unnecessary wait for bus.
- School management can get various reports of school bus i.e. when driver has started or stopped vehicle engine, Tracking History with route map, etc.
- School management can monitor unsafe driving of drivers and get over speed alerts.
- In case of accidental situations, driver can alert school management for emergency help by pressing one switch.
- School management can also monitor for misuse of school buses and get alerts for overstaying at one place.
- Helps transporters and authorities to plan and manage the bus routes better, saving money and ensuring smooth and quick rides to the destinations.
- Travel History with route map for more than 90 days.
