Smart Eye - Classic **GPS Vehicle Tracking System**

SaHarsh Solutions presents Smart Eye, A Vehicle Tracking System with combination of user friendly software and robust hardware. This system can locate any vehicle on real time basis. User can monitor and manage his fleets and can take useful decisions from the data he gets.

SaHarsh Solutions

Features:

- **Real time tracking:** Vehicle can be tracked in real time on computer by web based platform and on Mobile Phone by Android App.
- **Geo-Fence:** Geo-Fence is a virtual area or boundary of certain territory. You can define certain area on Map. If vehicle goes in or out of that area then it will alert with SMS.
- Multiple mobile numbers can be authorized in who can get alert messages.
- **Travelling History:** You can Play back/ replay the vehicle's past movement for more than 3 months with travelled route map, travelling time, speed, distance, etc.
- **Over-speed alert:** You can define certain speed. When vehicle moves more than this restricted speed, it will send an alert message.
- **Engine Off:** Vehicle engine can be turned Off remotely by just one SMS by authorized mobile. This feature is very useful at the time of Vehicle Theft.

User can get various alerts according to his requirements and can generate different reports for selected time.

Alerts:

- Over Speed Alerts
- Schedule Alerts: Vehicle location SMS at defined schedule time daily.
- POI Alerts: POI (Point of Interest) is one type of Geo-Fence.
- Geo Fence Alerts

Reports:

- Fleet Summary Report: It's a report of total travelling distance of vehicle
- History report
- Speed monitor Report
- Geo fence report
