Smart Eye – OBD GPS Tracker (Plug n Play VTS)

OBD GPS Tracker is especially made for Vehicle Tracking applications, this system can locate any vehicle on real time basis. It fits into vehicle's computer port and gets power from there so there is no need to run any single wire. It is extremely easy to install. With its high sensitivity GPS chip, it can locate vehicle in covert applications also.

Features:

- It's a Plug & Play Device, Easy to install and no need of wiring.
- If vehicle protocol matches with the device protocol, than it gives data related to engine health also.
- **Real time tracking:** Vehicle can be tracked in real time on computer by web based platform and on Mobile Phone by Android App.
- **Geo-Fence:** Geo-Fence is a virtual area or boundary of certain territory. You can define certain area on Map. If vehicle goes in or out of that area then it will alert with SMS.
- Multiple mobile numbers can be authorized in who can get alert messages.
- **Travelling History:** You can Play back/ replay the vehicle's past movement for more than 2 months with travelled route map, travelling time, speed, distance, etc.
- **Over-speed alert:** You can define certain speed. When vehicle moves more than this restricted speed, it will send an alert message.
